Is a Fire Watcher required to monitor this work?

Yes No (If required) Name of Watcher:

The following additional precautions must be performed before this TSWA Permit to be valid.

Appropriate traffic management controls are in place (e.g. Barricades, safety cones, telescopic poles, warning signs and spark/flash screens).

 Pressure relief valves have been vented (or are not applicable).

The area is free of contaminated ground, or that ground is covered.

 All fill / dip / vapour recovery covers <1500mm from work are adequately sealed.

Combustibles <10m away removed or wet-canvassed.

 Any open cracks in forecourt are filled and covered with wet sand (or similar measure).

Key controls have been discussed with site manager (or delegate)

 Where Site mains power has been used, an earth leakage device is installed.

Will Electrical equipment require isolation as part of the works Yes No

If Yes – An Electrical Isolation Permit must be filled out (copies available from CEXP Site Manager/Delegate)
